Di Legna

*The perfect embodiment of sophistication and style*

The perfect embodiment of sophistication and style for your drawers, the latest release from Holz, the Di Legna system consists of immaculately constructed solid Walnut frames for placing on a base of drawer matting. The Di Legna system has been carefully designed to enable the frames to be placed across the drawer width or parallel to the drawer sides which further serves to make each

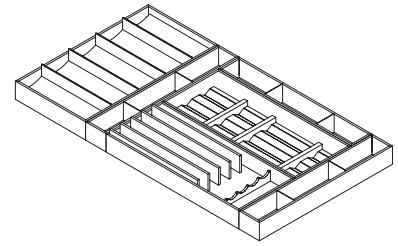

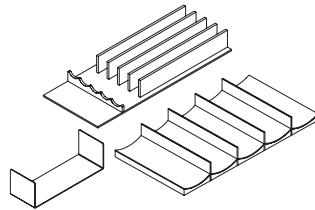

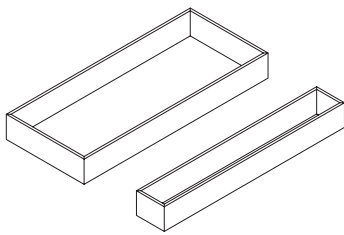

layout uniquely configurable. Combine Di Legna frames with matching Di Legna knife and spice container accessory components to really make the internals of your drawers the envy of all who have the pleasure of viewing them. Available in 2 depths to suit most brands of 500mm deep and 550mm deep straight sided drawer systems

# How it works

Holz Di Legna is designed to be uniquely configured depending on the drawer.

Di Legna frames can be combined with a range of Di Legna components to create any configuration you desire. With a unit height of 50mm, and the option of 500mm or 550mm depth, Holz Di Legna suits most brands of straight sided drawers.

1.

## Select your frames

Choose frames to help create your layout. The frames provide the structure for your chosen configuration

2.

## Select your components

Select your required components to best suit your storage requirements. This could include dividers, cutlery trays, spice racks.

3.

## Arrange your configuration

Place your frames and components inside your drawer in your desired layout. Experiment with different arrangements to make the most of the available space.
